

Term Project 1 - Peaks

A. BOGNAR

Data and Analytics Questions

Clean files, Loading and Stored Procedures

Changes made from raw to clean:

- Date format to SQL readable
- Commas removed to allow separation.
- Duplicate Primary keys found: Expeditions 1 KANG10101, members KANG10101 #

Analytical Layer, ETL, Trigger

- Analytic questions:
- Extract:
- Transform:
- Load:
- Stored: 1. By country peak, Number of peaks reached, category levels of peak
- Trigger: if added new peak in other 2 table, create it, if reached unreached, change it
- Views: High categories,

Data Mart, Views
